Why OSM?

- Geodata isn't
  - Free
  - Open
  - Current
- Wiki is obvious next step
- It's just *fun*

Some Quotes

Quote 1

"It's absolutely possible for a bunch of smart guys with the technology we have today to capture street networks, and potentially the major roads of the UK and minor roads"

© 2005 OpenStreetMap.org

Quote 1

"It's absolutely possible for a bunch of smart guys with the technology we have today to capture street networks, and potentially the major roads of the UK and minor roads"

Ed Parsons, ex-CTO Ordnance Survey

© 2005 OpenStreetMap.org

Quote 2

"If you don't make [lower-resolution mapping data] publicly available, there will be people with their cars and GPS devices, driving around with their laptops .. They will be cataloguing every lane, and enjoying it, driving 4×4s behind your farm at the dead of night. There will, if necessary, be a grass-roots remapping."

© 2005 OpenStreetMap.org

Quote 2

"If you don't make [lower-resolution mapping data] publicly available, there will be people with their cars and GPS devices, driving around with their laptops .. They will be cataloguing every lane, and enjoying it, driving 4×4s behind your farm at the dead of night. There will, if necessary, be a grass-roots remapping."

Tim Berners-Lee

Quote 3

"You could have a community capability where you took the GPS data of people driving around and started to see, oh, there's a new road that we don't have, a new route .. And so that data eventually should just come from the community with the right software infrastructure."

© 2005 OpenStreetMap.org

Quote 3

"You could have a community capability where you took the GPS data of people driving around and started to see, oh, there's a new road that we don't have, a new route .. And so that data eventually should just come from the community with the right software infrastructure."

Bill Gates

Uploaded at: Thu Dec 13 11:42:43 +0000 2007
Points: 814
Start coordinate: 47.522993088; 10.282216072 (map / edit)
Owner: Klaus Winzek
Description: Ostrachstr
Tags: Germany Sonthofen

OpenStreetMap is a free editable map of the whole world. It is made by people like you.

OpenStreetMap allows you to view, edit and use geographical data in a collaborative way from anywhere on Earth.

OpenStreetMap's hosting is kindly supported by the UCL VR Centre and bytemark.

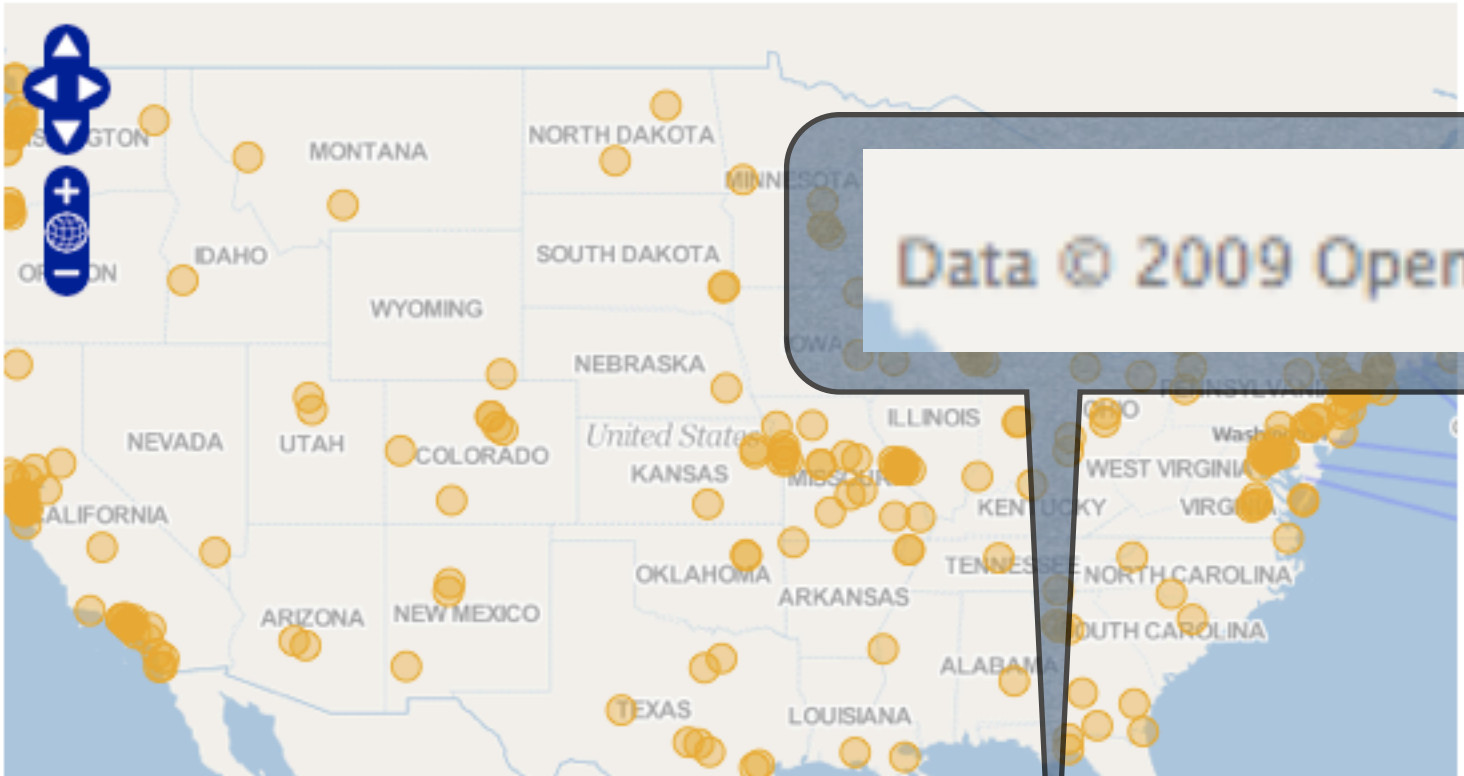
HOW ARE YOU DELIVERING ON CHANGE?

Whether you were already serving your country, or are responding to the President's call, share how you are delivering on change in your community.

Whether it is an hour per month helping those struggling in the current economy, tutoring kids in your neighborhood every day, or anything else, we want to highlight what Americans are doing to strengthen our country.



LOOKING FOR A WA
THAT'S RIGHT FOR

Serve.gov is a new portal for yo
Americans to find your own wa
own communities. Just choose
you – and type in your zip code
opportunities our partner orga
your area. Americans are puttin
country back on the right track

What about quality?

Dr Muki Haklay of UCL

"OSM quality is beyond good enough, it is a product that can be used for a wide range of activities"

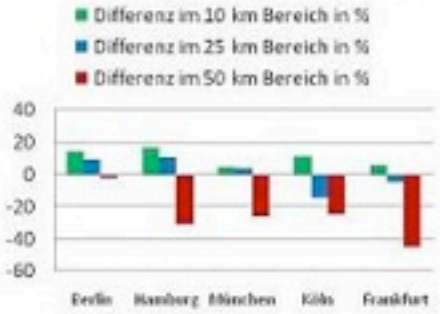
Based on a detailed analysis
http://tinyurl.com/mukiosm

Differenz der Gesamtlänge des gesamten Wegenetzes zwischen OpenStreetMap und Tele Atlas pro km²

Datenschwäche OSM

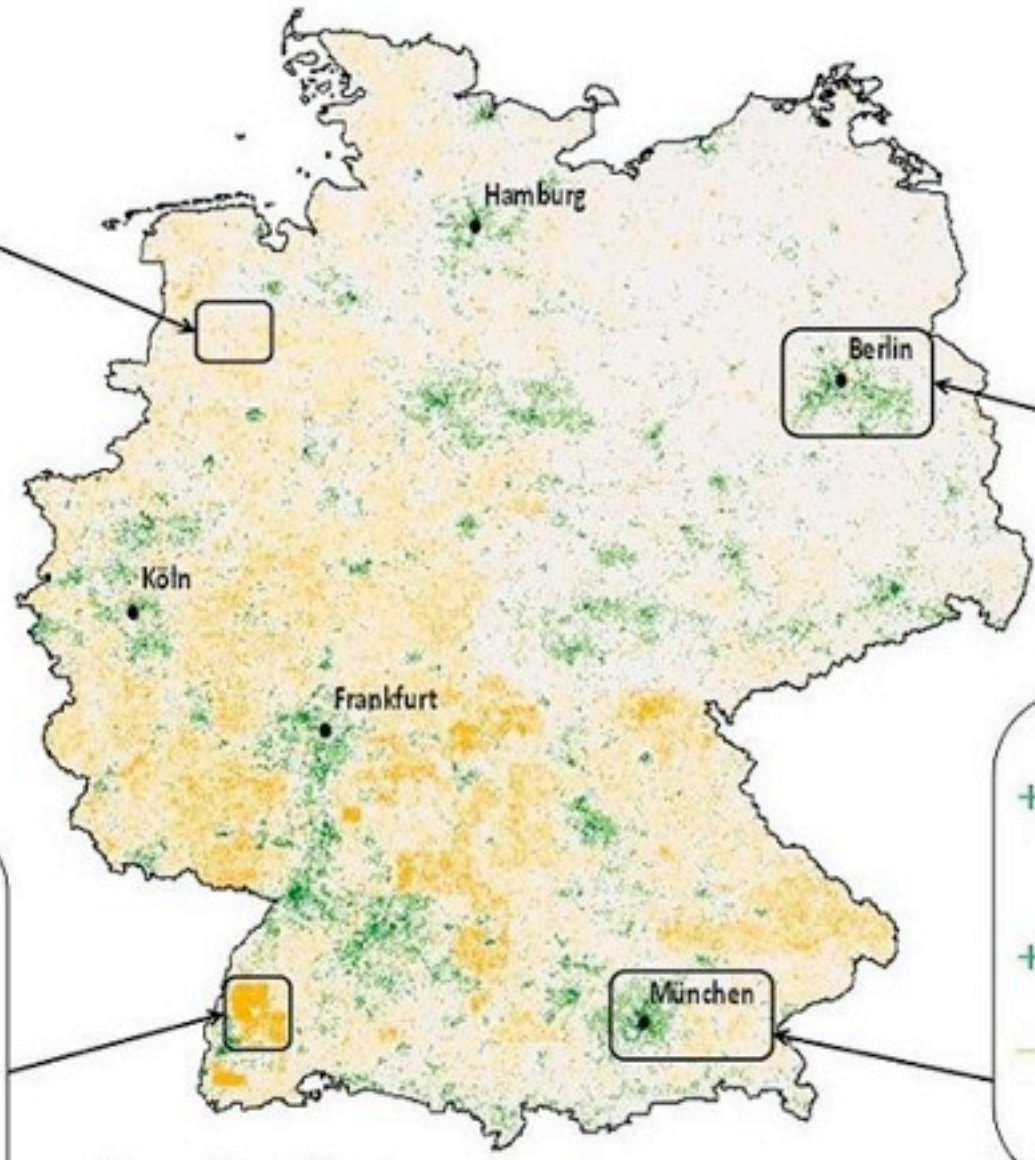
- **Deutliche Abnahme** der Datenvollständigkeit in geringer urban geprägten Gebieten.

Datenvollständigkeit von OpenStreetMap verglichen mit Teleatlas im Stadtgebiet und Umland



Datenstärke OSM

+ In Großstädten wie Berlin, Hamburg, München und Köln **übertrifft OpenStreetMap** die proprietären Daten.
+ Ursache: **höhere Datenvielfalt bei OpenStreetMap.**
+ Z.B. Hamburg seit Okt. 2008 als erste deutsche Großstadt **vollständig erfasst.**



Starke Differenzgebiete

- **Starke Differenzen** im Bereich des Südschwarzwaldes.
- Ursache: **höhere Datendichte bei Tele Atlas** (kleine Seitenwege).
- weitere starke Differenzgebiete in **Süd- und Zentraldeutschland.**

Fußgänger-Routing

+ **Verstärkte Erfassung** von kleinen, mit dem Auto nicht befahrbaren, Wegen bei OpenStreetMap.
+ Daten für **Fußgängerrouting in Großstädten** gut geeignet.
- auch bei Fußgängerdaten **starke Abnahme** der Datenqualität im weiteren Stadtumland.

Beispiel Mittelstädte

Positionsgenauigkeit
